School's Name : Irma Josefa Garcia

School's Principal: Perla

Community Name: Terrecillos, Moropocay, Nacaome

Student's Name: Nahun Nehemias Barahona

(Editor's note: Because children 3, 4 and 5 years old are substantially less physically developed than a child 6 years old, the Honduras Government and Honduras educators established a shorter walking distance for kindergarten children than for elementary school children. As a result, certain kindergartens are not close to an elementary school. These stand-alone kindergartens must have a person who is responsible to the government and parents for operations of the school; these kindergartens must have a principal. Several of our schools have stand-alone kindergartens. To these kindergarten principals, performance is measured by successfully delivering children to 1st grade who are ready for 1st grade. The following story is from one such kindergarten principal.)

Since 2007, we have been part of the Lunches for Learning program with very delightful results. Every year, children enroll in our kindergarten to start their learning experience. This is the case of Nahun, who started kindergarten in 2011.

He was born with a severe case of malnutrition due to his mother's unstable condition. Nahun received his daily vitamins and meal. Now, Nahun is a very active, playful, sweet and healthy boy, who pays attention in class and maintains good grades. Even after preschool and entering 1st grade, he will continue to have a nutritious meal in his stomach, and he will continue to put knowledge in his mind. He will have his daily glass of milk and nutritious meal.

Lugar Torrecillas Meropocoy

Nahen Nohemios Barahona Edad 7 años

Desde el año 2007 hemos sido beneficiados con el programa Merienda para aprender con un resultado placentero ya que los niños que se matriculan ingresan a la escuela a seguir su proceso de enseñanza aprendizaje en el caso de Nahen ingresa al jardín en el año 2011 es beneficiado con el programa recibiendo su merienda y vitamina todos los días. Nahen nació con un grado de desnutrición, por las condiciones en que se alimentó su madre. Ahora Nahen es un niño despierto, activo, que pone mucha atención en clases, es cariñoso y muy juguetón. Nahen terminando su preparatoria sigue tomando su merienda y vitaminas en la escuela Jose Angel Curato ya que es beneficiada. Solo recordar que Nahen es un niño especial y gracias al programa Nahen sonreí tomando su vaso de leche
